EXPERIMENT 4

ROLL NO: 240701623 NAME: Adavan R

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io

This prototype represents a **Ferrari car booking application** where users browse cars, view specifications and complete booking. Each screen contains recognizable navigation patterns and some interpretative elements to test usability.

Screen 1 — Landing Page

Purpose: Entry screen of the application

Familiar Elements

1. **Brand Logo (Ferrari Emblem) – Top Area**
   - Clearly indicates brand identity
   - Users instantly recognize the application purpose
2. **"SIGN IN" Button – Bottom Center**
   - Standard call-to-action button
   - Guides users to authentication process

Usability Observation

- Users immediately understand they must log in to continue
- No learning effort required

Screen 2 — Login Page

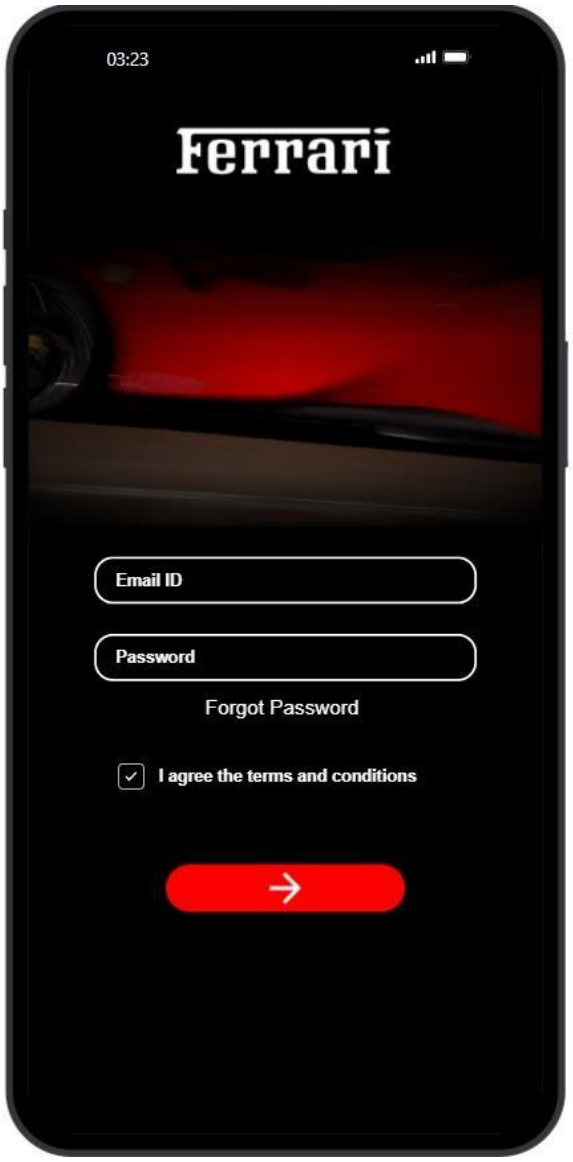
Purpose: User authentication

Familiar Elements

1. **Email ID Field**
   - Standard text input for login credential
2. **Password Field**
   - Secure authentication pattern
3. **Forgot Password Option**
   - Expected recovery feature
4. **Terms & Conditions Checkbox**
   - Common agreement confirmation
5. **Arrow Button (→)**
   - Represents proceeding to next screen

Usability Observation

- Conventional login form improves learnability
- Arrow instead of "Login" text requires slight interpretation



Screen 3 — Home Page

Purpose: Main promotional screen

Familiar Elements

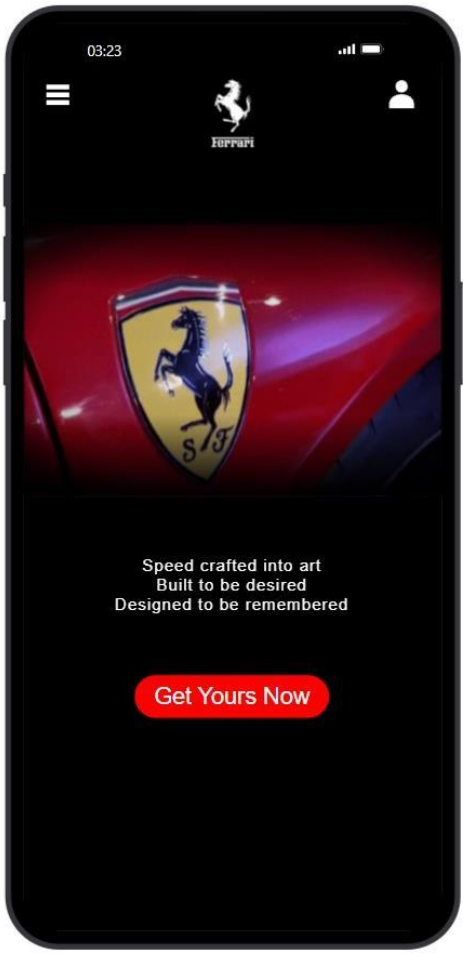
1. **Hamburger Menu (☰) – Top Left**
   - Indicates navigation drawer
2. **Profile Icon – Top Right**
   - Represents user account access
3. **Primary CTA: "Get Yours Now"**
   - Directs user to explore cars

Possibly Unfamiliar

- Promotional tagline instead of functional menu options
- Users rely on button rather than navigation

Usability Observation

- Visually appealing but action depends on CTA understanding



Screen 4 — Car Listing Page

Purpose: Display available cars

Familiar Elements

1. **Scrollable Car Cards**
    - Common e-commerce browsing pattern
2. **Back Arrow (←)**
    - Returns to previous page
3. **Profile Icon**
    - Consistent navigation element

Usability Observation

- Users naturally scroll to explore options
- Minimal cognitive load

Screen 5 — Car Details (Ferrari F80)

Purpose: Show specifications

Familiar Elements

1. **Back Arrow**
   - Return navigation
2. **Specification Text Section**
   - Informational layout
3. **"BOOK NOW" Button**
   - Primary action button

Usability Observation

- Clear task: read → decide → book
- Efficient decision-making flow

Screen 6 — Car Details (Ferrari SF90)

Purpose: Compare another model

Familiar Elements

1. **Car Image + Specs Layout**
    - Same pattern as previous screen
2. **Book Now CTA**
    - Consistent action placement

Usability Observation

- Consistency improves memorability
- Users learn interaction after first car

Screen 7 — Car Details (Ferrari SP3)

Purpose: Final selection before purchase

Familiar Elements

1. **Back Arrow Navigation**
2. **Performance Specifications**
3. **Book Now Button**

Usability Observation

- Repeated layout reduces learning effort
- Faster decision making

Screen 8 — Booking Confirmation Page

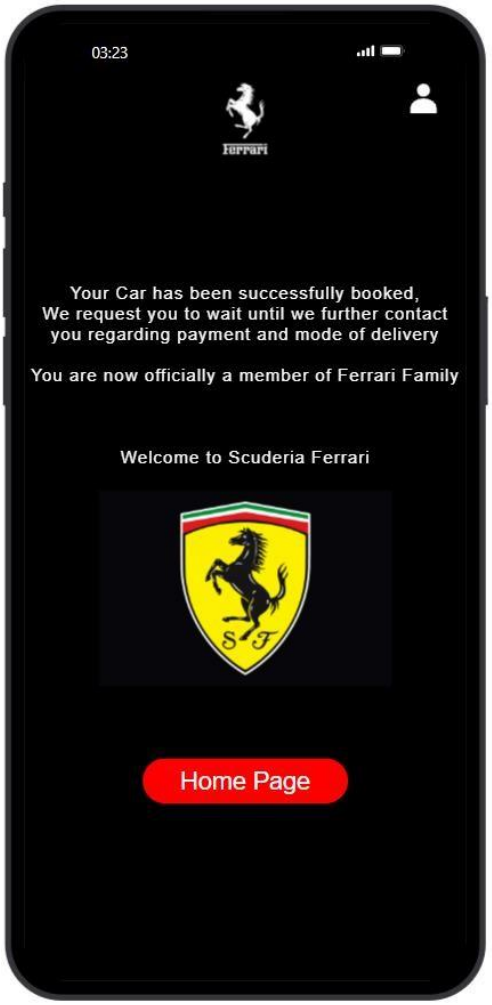
Purpose: Final confirmation after booking

Familiar Elements

1. **Confirmation Message**
   - Provides feedback of successful action
2. **Brand Logo**
   - Reinforces trust
3. **Home Page Button**
   - Allows navigation back to start

Usability Observation

- Provides closure and assurance
- Clear end of task flow



Overall Usability Result

The prototype demonstrates:

- Familiar navigation (buttons, back arrow, login fields) → quick understanding
- Repeated layout → improved learnability
- CTA-based navigation → minimal confusion
- Branding elements → trust and clarity

Conclusion:
Users complete tasks efficiently because recognition-based UI reduces cognitive load compared to unfamiliar navigation patterns.
